DETAILED ACTION

The response filed **11/07/07** presents remarks and arguments to the office action mailed **8/20/07**. Applicants' request for reconsideration of the rejection of claims in the last office action has been considered.

Applicants' arguments, filed, have been fully considered but they are not deemed to be persuasive. Rejections and/or objections not reiterated from previous office actions are hereby withdrawn. The following rejections and/or objections are either reiterated or newly applied. They constitute the complete set presently being applied to the instant application.

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Status of Claims

Claims 20-24 are pending in this office action and claim 20 is amended.

Claim Objections

Claims 21-24 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claim Rejections - 35 USC § 103

Applicant argues Feist et al. do not teach a sesquiterpene, but rather a sesquimer and that the example 5 of the Feist makes clear that sesquiterpenes are different from sesquimers.

Art Unit: 1614

Careful consideration has been given to Applicant's argument and found not persuasive because Eugenol is taught in the prior art, and is taught to have no odor, whether it is a sesquimer or a sesquiterpene would not change because the reference preferred calling or naming it sesquimer. As to the reference to example 5, as clearly depicted, the Eugenol is in the alcohol form is taught as an alcohol, see Example 5, col. 10, line 45. Therefore suggesting that the eugenol has the property of a sesquiterpene contrary to Applicant's assertion. Further, Example 5 is to a mixture of components to form a pharmaceutical composition.

Claim 20 is directed to the vaporization of eugenol with no odor. That is taught, whereby the eugenol is distilled with no odor detected. Thus the claims read on the prior art of record. The rejection is therefore maintained and repeated.

Claim 20 remain rejected under 35 U.S.C. 103(a) as being unpatentable over Feist et al., US 4,659,493.

As required by instant claim 20, Feist et al. teach a distillation of a sesquimer (see col. 5, lines 51-55) that has no detectable odor (see col. 6, lines 8-9), wherein the sesquima is eugenol.

Thus one of ordinary skill in the art would have been motivated to use a sesquimer such as eugenol in a vaporization system because distillation is a form of vaporization that is used with heat. In view of Feist teaching, one of ordinary skill in the art would have been motivated to use the compound in a vaporization system and would have expect the composition to have no smell. The reference teaches no smell is detectable (see col. 6, lines 8-9).

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
